If your program has non-standard GEDCOM tags you may have data drop out FTM used 'Cause of death' before anyone else did, for instance.. Roots Magic, Family Tree Maker and PAF will take all of your research, probably, if you export a GEDCOM from your current program.. Download Family Tree I have it downloaded so I can check on various features on the different programs.. This would probably help you find a more current software that you can use Most of the programs have the ability to download from other software so you will not have to retype everything, but having a copy of your work on a disc or external hard drive is a good idea as well. After you import 'Mydata ged', look for 'Mydata lis' It will have all of the errors.. If tags do drop out, you can add the data back in as a note I like RM the best of the three, but you can Google 'Genealogy Software Comparisons' to get professional reviewer's opinions.. But I also have tried Master Genealogists, LDS, Family Tree Maker (FTM) 2005, and am currently attempting FTM 2009.. • You can only upload photos smaller than 5 MB. 0 is not supported by Serra If you type Genealogy Software into the search engine and got to the Wikipedia site there is a chart of comparison of software that includes information on features and cost.. • You can only upload files of type PNG, JPG, or JPEG • You can only upload files of type 3GP, 3GPP, MP4, MOV,
